

**Technology Services Committee  
IPTel Workgroup Meeting Notes  
November 17, 2006**

**Attendees:** Joanne Lord, Roy Simpson, Victor Stiles, Larry Eastburn, Ken Purcell, Joan Obert, Alan Friedman, Michelle Lew, Lowell McPherson

**Announcements:**

Larry Eastburn opened the meeting with a roundtable introduction of all attendees.

**Project Update:**

**CDI Telecommunications Infrastructure Replacement Project (TIRP) Status:**

Roy Simpson, Department of Insurance (DOI), provided a PowerPoint presentation on the DOI project. It was request that the presentation file be shared with all meeting attendees and remaining group members. Larry Eastburn will ensure that the file is sent with the meeting minutes.

Lowell McPherson discussed the issues with the IPTel implementation at their new Evergreen facility. DTS denied their request for exemption from CALNET II. Since they are mainly Nortel, CALNET II could have big impact on their new building implementation and current operations. Will need to get more info on CALNET II, Module 3 to determine what issues they will have to address.

The group asked that a presentation from the CALNET II, Module 3 vendor be scheduled to get a better understanding of the offerings and options that will be available for IPTel.

The group discussed the level support from DTS for IPTel. The current implementations are requiring a high level of support which is currently being handled in-house. DTS has not stepped up to supporting service and in some cases has had negative impact on IPTel services.
